

Meet the Doctor . . .

"Your smile plays such important roles in your life — laughing, speaking, smiling and kissing. That's why my goal is to make sure that your smile is as beautiful and healthy as it can be."

Robert G. Winnard, DMD, PA
"Creating beautiful smiles and enhancing self-esteem, for life"

Robert G. Winnard, DMD

Harvard-Trained Education

"By attending respected schools for my education and training, I had the opportunity to learn from acknowledged experts in all branches of dentistry, which has elevated the level of care I am able to provide. This higher level of education allows me to deliver a higher level of dental care to you."

Certificate of Orthodontics: Harvard University School of Dental Medicine

DMD: Tufts University School of Dental Medicine

General Practice Residency: Sinai Hospital, Baltimore, MD

Master of Medical Science: Harvard Medical School

Continuing Education: Completes four times the required number of hours

Active in Dental Societies

"In today's rapidly changing world of dentistry, if I relied solely on my formal education, I might be unaware of breakthrough technology or a new procedure that could benefit my patients. One of the ways I continually fine-tune my knowledge is through membership in national and regional professional associations. I am able to bring this knowledge to my patients."

Member: American Association of Orthodontists, American Dental Association, Maryland Association of Orthodontists, Maryland State Dental Association, Howard County Dental Society, Past President of Chesapeake Dental Study Club

Philosophy of Quality Care

"If there is one thing I constantly strive to provide to my patients, it's quality treatment at a fair price. I wanted to become an orthodontist because I love people, both kids and adults — and it shows. They appreciate my personalized attention, my friendly care and the follow-up calls at home to make sure they are comfortable. Nothing is more important to me than providing some of the absolute finest orthodontic care to this community."
